Export this lightning map as a PDF file

Figure 8: Menu Screen with Advanced Setting Highlighted

The image shows a sequence of steps to export a lightning map as a PDF file. It starts with a map application interface where the 'Layers' menu is open. A green arrow points to a gear icon labeled 'Advanced Settings'. Another green arrow points to a button labeled 'Export Layers' with the text 'Export Layers will appear'. Below this, the 'Export Map' dialog box is shown, with green arrows pointing to the 'Email' field (labeled 'Enter email addresses (and choose a title if desired)'), the 'Export Format' dropdown (set to 'Geospatial PDF'), and the 'Export' button (labeled 'Click Export').

Advanced Settings

Export Layers will appear

Enter email addresses (and choose a title if desired).

Click Export
